## Ustik® Rubber Underlay is so easy to lay

### ✓ STEP 1

Ensure the floor surface is sufficiently level and dry. Roll out Ustik® underlay with the plastic release film facing upwards, and ensure joins are butted together. When using Ustik® Rubber Underlay as a moisture barrier, cover any joins with the tape provided.

### ✓ STEP 2

Lay the entire area and trim excess edges with a utility knife, leaving a 3mm gap around wall perimeters for expansion.

### ✓ STEP 3

It is important when laying the ULay™ Luxury Vinyl planks onto the Ustik® Underlay that you only peel back small sections of the release film, ensuring the underlay surface doesn't stick to your knees, tools, or other items. There is no need to wait for Ustik® underlay to relax. Simply peel back the release film and lay your desired flooring product.

For more detailed installation instructions please check the website [www.ustik.com.au](http://www.ustik.com.au) for further details

<b>Material</b>	Recycled Rubber Foam, Pu Foam and Rubber Granules
<b>Binder</b>	Pu Binder

**RUBBER UNDERLAY**

## Finally...

A smart innovative easy to install and cost effective solution to the traditional rubber underlay

## What is Ustik® Rubber Underlay?

A unique one piece underlay construction offering acoustic, anti-vibration, insulation benefits, moisture barrier and a high grab self-stick adhesive glue suitable to lay on a range of flooring finishes.

Ustik® rubber underlay also acts as a (floating floor system), that doesn't require to be glued down.

## The perfect choice as a base for U Lay™ Luxury Vinyl Planks

Simply peel back the release film and start laying straight on to the underlay.

Choose from a range of popular look alike timber finishes.

Also ideal for carpet tiles, ceramic tiles and a range of other flooring products.

## A unique one piece construction that ticks all the boxes

- 1 Tough Protective Film.**  
The plastic tear resistant film makes it easy to peel away from the rubber making laying even easier
- 2 Innovative Adhesive Glue**  
The specially formulated high grab adhesive. No more messy glues or nails saving time and money
- 3 Waterproof Rubber construction**  
Unlike other manufacturers, the waterproof layer is embedded into the rubber construction to ensure the best protection against moisture both from the surface and floor
- 4 Long lasting Rubber Underlay**  
Ustik® underlay is long lasting and adds both comfort and acoustic benefits. Plus it comes in a 2.5Mm high density (17db) and 3.0Mm low density (19db) to suit varied applications let it be in the home or more heavy commercial traffic areas
- 5 Smart Moisture Barrier**  
The TPU moisture barrier helps a very common problem of rising damp from the floor base

## The unique benefits of Ustik® Rubber Underlay

### Self-Adhesive

High grab self-adhesive. No more glues or nails.

### Improved Acoustic & Thermal qualities

Assists in quietening room surrounds, and provides great insulation.

### Easy Installation

Simply peel and stick. So quick and easy.

### Comfort Underfoot

The granulated recycled rubber construction provides a comfort base.

### TPU Waterproof Moisture barrier

A highly effective barrier for rising damp.

### Save time and Money

Next to no trades or glues so will save you time and money.
